

Concept to Reality

Customized Interior Speaker

Labyrinth Speaker System

This is a one-of-a-kind handmade non-directional speaker system, customized by watching, feeling, and hearing customer's tastes. The biggest feature is that you can have its exterior customized using colorful materials including Sumida's traditional lacquer paper (about 40 types), Japanese paper, textiles, remade Kimono garments, and pictures. Thus, it provides various moods in stores, hotels, halls and commercial accommodations. Also, for individual customers, our company provides highly satisfying speaker system which arranges your room's atmosphere, by adding your memorabilia to its exterior. The production includes careful individual interviews with customers and is all handmade for reflecting your tastes to the speaker as much as possible. The best wish for having a wonderful time immersed in your favorite music with this individually customized speaker.

Labyrinth Speaker System

Labyrinth 1000 speaker system reflects the sound to ceilings for it does not have a top plate, and it can maximize the range of the sound and you can feel like your body wrapped by the sound without limiting the place to set, anywhere on the floor.

Labyrinth 2000 speaker system widens the range of the sound horizontally, and it enables you to feel like the sound coming into you directly wherever you are by setting on the same height as yours.

Both Labyrinth 1000 and 2000 are suitable for middle tunes, but its back-loaded horn speaker system provides rich bass and natural sound quality suitable for jazz, jazz vocal, and easy listening, and you will not get tired by the sound quality

and be able to have a relaxing time being immersed in the spatially spreading music from the speaker.

Process to Order

This speaker is characterized by totally customized exterior because we would like to ask you what tastes you have for this product. This product is totally handmade, so it is positively and pleasantly different from the other products. Also, it normally takes about one to three months to delivery, so we would ask customers to wait for it even if they are in hurry. We appreciate your understanding when you order.

1. Interview and Decide the Version

We carefully listen to your tastes and decide the version, so we are glad you to visit us and meet our sales representative and decide it after hearing its sound.

2. Estimation

We estimate its cost based on the decided version. The price of the main body is fixed, but additional estimation would be needed for its exterior design and assembly.

3. Order

The order would be proceeded if you agree on the above.

4. Payment

Because this is individually customized product, the production will be started after we confirmed your payment.

5. Delivery

The delivery takes one to three months because of its totally handmade process.

The way to deliver can be discussed with our sales representatives.

Even though our products are carefully handmade, there could be some defects. We would appreciate your understanding.

Notes

This speaker is assembled by gluing each component. Thus, it cannot be separated

into its individual parts when customers attempt to repair it. Repairable part is only speaker's united part. We would ask for your understanding when you order.

Fixed Price (excluding tax)

Labyrinth 1000 Base price: 140,000 yen + additional estimation for exterior materials and assembly

Labyrinth 2000 Base price: 180,000 yen + additional estimation for exterior materials and assembly

Additionally, we charge other necessary expenses such as consumption tax, delivery wages.
